Personal Statement

I'm a creative front-end engineer with a background in full-stack development and digital art.

About Me

- I'm a skilled migrant in the Netherlands.
- I care for the product, the customers, and the team.
- I create high quality, reusable, and maintainable code.
- I know the React ecosystem, best practices, and trends in the industry.
- I can use workshops, pair programming, and writing documents to share knowledge.
- I'm proactive and I can see the possible technical challenges upfront.
- I support my teammates and I can mentor junior developers.
- I'm good at problem solving, researching and prototyping.
- I can create balance between code health and business requirements in my work.
- I value feedback.

Niche

Creating:

- React and Redux web applications.
- High quality and reusable React components.
- Work of art UI with standard CSS (CSS is my superpower).
- Performant code that is semantic and easy to understand too.

Experience

[Storio Group \(former albelli.nl\)](#) - Senior software engineer IV (full time)

March 2022 - present, Amsterdam

In Storio, I'm a key member of the Online Editor Team and I have prototyped and developed a variety of large features.

I feel proud for improving our team standards by introduction and implementation of modern solutions, holding workshops, researching, prototyping, documenting and enhancing our code quality mainly through improving our code review processes and pair programming.

In my current position, I develop and maintain multiple applications, but my main contribution is to the company's next generation web editor – an AI powered mobile first single page application that allows users to create a variety of photo products in a few easy steps.

Tech stack: React, Redux Toolkit, Redux Saga, SASS modules, React Testing Library, Redux Saga Test Plan, Playwright, Parcel, Vite, GitHub Actions, Octopus, AWS, GitHub and Scrum.

[Yoello](#) - Senior front-end developer (full time)

June 2020 - December 2021, United Kingdom (remote from Tehran)

Yoello is a fin-tech startup based in Cardiff, Wales.

In Yoello, I was part of a fast paced team that quickly converted designs and ideas to new features.

A strong leadership together with teams of strong individuals that collaborated with high efficiency, made Yoello a multi award winning startup during the COVID pandemic.

Tech stack: Typescript, React, Next.js, Redux, SASS, MUI, JSS, Jest, Cypress, Webpack, GitHub and Scrum.

[Databourg Systems](#) - Senior front-end developer (part time)

November 2020 - April 2021, Luxembourg (remote from Tehran)

Databourg Systems is a startup developed at the University of Luxembourg.

What I created for Databourg later inspired me to develop a new open source NPM package that included new and improved features.

Tech stack: Typescript, React, Mapbox, GIS, GitHub and Kanban.

[Miare](#) - Senior front-end developer (full time)

December 2019 - April 2020, Tehran

Miare is a logistics and online delivery startup.

Tech stack: Typescript, React, Redux, SASS, Jest, Webpack, GIS, GitLab and Kanban.

[Boro](#) - Co-founder and developer (full time)

June 2019 - December 2019, Tehran

Boro was a Tours and Activities startup developed as a PWA.

It was created using a JavaScript SDK and a UI framework that I built around Mapbox GL JS.

Map.ir - *Senior front-end developer (full time)*

May 2017 - May 2019, Tehran

In Map, I started my work by selecting our team's front-end tech stack, and I became the main contributor to creation and development of multiple green field products.

During my time in Map, I developed a single page application for B2C, and a JavaScript SDK for our B2B users. I also worked in cross-functional teams to develop GIS and BI related products.

One of my greatest achievements at this time was mentoring multiple interns and juniors.

Tech stack: pure JavaScript, pure CSS, Vue, React, Angular, jQuery, LeafletJS, GeoServer, Webpack, GIS, GitLab and Scrum.

Freelance full-stack development - *Full-stack developer*

2006 - 2017, Rasht

For about a decade I worked as a freelance full-stack developer.

I used to use a variety of front-end tech together with PHP to develop 0-100 of software before I decided to solely focus my career as a front-end developer in 2017.

Education

University of Tabriz - *Bachelor of Science (Electrical Engineering - Control Engineering)*

September 2001 - September 2007, Tabriz, Iran

Self-education - *Front-end ninja*

2005 - Present

Skills

Web development, JavaScript, TypeScript, HTML5, CSS3, SASS, SCSS module, Less, React, Redux, Redux Toolkit, Redux Saga, React Query, Next.js, Vue 2, SolidJS, jQuery, MUI, JSS, React Testing Library, Redux Saga Test Plan, Jest, Cypress, Playwright, Webpack, Parcel, Vite, Gulp, UI design, PWA, GIS, GeoServer, Mapbox GL JS, LeafletJS, Git, GitHub, GitLab, GitHub Actions, CI/CD, Front-end security, PHP, Laravel, Grafana, Figma, Agile, Scrum, Kanban.

Interests

Drawing, traveling, history, cycling, IoT, and movies.
